Penutian Hypothesis Retrospect And Prospect

Lyle Campbell

*California Indian Languages* Victor Golla, 2022-02 Nowhere was the linguistic diversity of the New World more extreme than in California, where an extraordinary variety of village-dwelling peoples spoke seventy-eight mutually unintelligible languages. This comprehensive illustrated handbook, a major synthesis of more than 150 years of documentation and study, reviews what we now know about California's indigenous languages. Victor Golla outlines the basic structural features of more than two dozen language types and cites all the major sources, both published and unpublished, for the documentation of these languages—from the earliest vocabularies collected by explorers and missionaries, to the data amassed during the twentieth-century by Alfred Kroeber and his colleagues, to the extraordinary work of John P. Harrington and C. Hart Merriam. Golla also devotes chapters to the role of language in reconstructing prehistory, and to the intertwining of language and culture in pre-contact California societies, making this work, the first of its kind, an essential reference on California’s remarkable Indian languages.

*A Grammar of Patwin* Lewis C. Lawyer, 2022-03 A Grammar of Patwin brings together two hundred years of word lists, notebooks, audio recordings, and manuscripts from archives across the United States and synthesizes this scattered collection into the first published description of the Patwin language.

*A History of Humanity* Patrick Manning, 2020-02-27 Humanity today functions as a gigantic, world-encompassing system. Renowned world historian, Patrick Manning traces how this human system evolved from Homo Sapiens' beginnings over 200,000 years ago right up to the present day. He focuses on three great shifts in the scale of social organization - the rise of syntactical language, of agricultural society, and today's newly global social discourse - and links processes of social evolution to the dynamics of biological and cultural evolution. Throughout each of these shifts, migration and social diversity have been central, and social institutions have existed in a delicate balance, serving not just their own members but undergoing regulation from society. Integrating approaches from world history, environmental studies, biological and cultural evolution, social anthropology, sociology, and evolutionary linguistics, Patrick Manning offers an unprecedented account of the evolution of humans and our complex social system and explores the crises facing that human system today.

*A Prehistory of Western North America* David Leedom Shaul, 2014-06-30 This book offers a new approach to the use of linguistic data to reconstruct prehistory. The author shows how a well-studied language family—in this case Uto-
Aztecan—can be used as an instrument for reconstructing prehistory. The main focus of Shaul’s work is the mapping of Uto-Aztecan. By presenting various models of Uto-Aztecan prehistory, by assessing multiple models simultaneously, and by guiding readers through areas where the evidence is not so clear, Shaul helps nonspecialists develop the tools needed for evaluating various historical linguistics models themselves. He evaluates both archaeological and genetic evidence as well, placing it carefully alongside the linguistic evidence he knows best. Shaul’s thorough treatment provides many new avenues for future research on the historical anthropology of western North America.

**Motion, Direction and Location in Languages** Erin Shay, Uwe Seibert, 2003-09-18 This book contributes to an area of study that is of interest to linguists of all backgrounds. Typological in nature this volume presents data analysis from the major language families of Africa as well as Sino-Tibetan, Austronesian, Japanese, Indo-European, Siouan and Penutian. The 16 contributors to the volume share a commitment to examining the language phenomena pertaining to the volume’s theme with a fresh eye. While most of the papers make reference to existing theoretical frameworks, each also makes a novel and sometimes surprising contribution to the body of knowledge and theory concerning motional, directional and locational predicates, complements, morphology, adpositions and other phenomena. This collection of articles suitably complements courses on comparative and diachronic linguistics, semantics, syntax, typology, or field methods.

**The Indigenous Languages of the Americas** Lyle Campbell, 2024 The Indigenous Languages of the Americas is a comprehensive assessment of what is known about their history and classification. It identifies gaps in knowledge and resolves controversial issues while making new contributions of its own. The book deals with the major themes involving these languages: classification and history of the Indigenous languages of the Americas; issues involving language names; origins of the languages of the New World; unclassified and spurious languages; hypotheses of distant linguistic relationships; linguistic areas; contact languages (pidgins, lingua francas, mixed languages); and loanwords and neologisms.

**Typological Hierarchies in Synchrony and Diachrony** Sonia Cristofaro, Fernando Zúñiga, 2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity. Explanations for typological hierarchies, however, are usually based on the synchronic properties of the patterns described by individual hierarchies, not the actual diachronic processes that give rise to these patterns cross-linguistically. This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies. To this end, diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology, historical linguistics, and language documentation. This evidence suggests a rethinking of possible explanations for typological hierarchies, as well as the very notion of typological universals in general. For this reason, the book will be of interest not only to the broad typological community, but also historical linguists, cognitive linguists, and psycholinguists.
The Handbook of Language Contact  Raymond Hickey, 2013-04-24 The Handbook of Language Contact offers systematic coverage of the major issues in this field – ranging from the value of contact explanations in linguistics, to the impact of immigration, to dialectology – combining new research from a team of globally renowned scholars, with case studies of numerous languages. An authoritative reference work exploring the major issues in the field of language contact: the study of how language changes when speakers of distinct speech varieties interact Brings together 40 specially-commissioned essays by an international team of scholars Examines language contact in societies which have significant immigration populations, and includes a fascinating cross-section of case studies drawing on languages across the world Accessibly structured into sections exploring the place of contact studies within linguistics as a whole; the value of contact studies for research into language change; and language contact in the context of work on language and society Explores a broad range of topics, making it an excellent resource for both faculty and students across a variety of fields within linguistics

Millennia of Language Change  Peter Trudgill, 2020-04-16 Were Stone-Age languages really more complex than their modern counterparts? Was Basque actually once spoken over all of Western Europe? Were Welsh-speaking slaves truly responsible for the loss of English morphology? This latest collection of Peter Trudgill’s most seminal articles explores these questions and more. Focused around the theme of sociolinguistics and language change across deep historical millennia (the Palaeolithic era to the Early Middle Ages), the essays explore topics in historical linguistics, dialectology, sociolinguistics, language change, linguistic typology, geolinguistics, and language contact phenomena. Each paper is fully updated for this volume, and includes linking commentaries and summaries, for easy cross-reference. This collection will be indispensable to academic specialists and graduate students with an interest in the sociolinguistic aspects of historical linguistics.

Zuni Origins  David A. Gregory, David R. Wilcox, 2015-11-01 A Choice Outstanding Academic Title The Zuni are a Southwestern people whose origins have long intrigued anthropologists. This volume presents fresh approaches to that question from both anthropological and traditional perspectives, exploring the origins of the tribe and the influences that have affected their way of life. Utilizing macro-regional approaches, it brings together many decades of research in the Zuni and Mogollon areas, incorporating archaeological evidence, environmental data, and linguistic analyses to propose new links among early Southwestern peoples. The findings reported here postulate the differentiation of the Zuni language at least 7,000 to 8,000 years ago, following the initial peopling of the hemisphere, and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers. Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon. Others test the Mogollon-Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro-regional analyses of environments, sites, pottery, basketry, and rock art. Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then
express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography. Two internationally known scholars then critique the essays, and the editors present a new research design for pursuing the question of Zuni origins. By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture, Zuni Origins is the only volume to address this subject with such a breadth of data and interpretations. It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity, migration, incipient agriculture, and linguistic origins.

**Functional-Historical Approaches to Explanation**
Tim Thornes,Erik Andvik,Gwendolyn Hyslop,Joana Jansen,2013-07-25
Contributions from both well-known practitioners and new voices in the areas of language typology, historical linguistics, and function-based approaches to language description define this volume, as does its foci in two major geographical areas — southeast Asia and northwestern North America. All of the papers appeal, in one way or another, to functional-historical approaches to explanation. Behind this appeal lies an assumption that languages are selective in their development in ways that are dependent upon the communicative tasks to which they are put. As such, language function accounts for both variation and historical development over time.

**The Gift of Knowledge / Ttnúwit Átawish Nch’inch’imamí**
Virginia R. Beavert,2017-06-01
The Gift of Knowledge / Ttnuwit Atawish Nch’inch’imamí is a treasure trove of material for those interested in Native American culture. Author Virginia Beavert grew up in a traditional, Indian-speaking household. Both her parents and her maternal grandmother were shamans, and her childhood was populated by people who spoke tribal dialects and languages: Nez Perce, Umatilla, Klikatat, and Yakima Ichishkiin. Her work on Native languages began at age twelve, when she met linguist Melville Jacobs while working for his student, Margaret Kendell. When Jacobs realized that Beavert was a fluent speaker of the Klikatat language, he taught her to read and write the orthography he had developed to record Klikatat myths. After a stint in the U.S. Air Force during World War II, Beavert went on to earn graduate degrees in education and linguistics, and she has contributed to numerous projects for the preservation of Native language and teachings. Beavert narrates highlights from her own life and presents cultural teachings, oral history, and stories (many in bilingual Ishishkiin-English format) about family life, religion, ceremonies, food gathering, and other aspects of traditional culture.

**Native Languages of the Americas**
Thomas Sebeok,2013-11-11
Thirteen of the chapters that comprise the contents of this first volume of Native Languages of the Americas were originally commissioned by the undersigned in his capacity as Editor of the fourteen volume series (1963-1976), Current Trends in Linguistics. All appeared, in 1973, under Part Three of the quadripartite Vol. 10, subtitled Linguistics in North America. Two additional chapters are being held over for the volume to follow shortly, devoted to Central and South American lan guages and linguistics, where they more appropriately belong. A fourteenth chapter, on the Historiography of native North A merican linguistics, was written similarly by invitation, for Vol.
13, subtitled Historiography of Linguistics, published in 1975. Both Volumes 10 and 13 were jointly financed by the United States National Science Foundation and National Endowment for the Humanities, with an enhancing contribution to the former by the Canada Council. The generosity of these funding agencies was, of course, previously acknowledged in my respective Editor's Introductions to the two books mentioned, but cannot be repeated too often: without their welcome and timely assistance, the global project could scarcely have been realized on so comprehensive a scale. The Current Trends in Linguistics series was a long-term venture of Mouton Publishers, of The Hague, under the imaginative in-house direction of Peter de Ridder. Various spin-offs were foreseen, and some of them happily realized.

**The Relationship of Wintuan to Plateau Penutian** Stefan Liedtke, 2007

*Proceedings of the Meeting of the Hokan-Penutian Workshop*, 2002

**Linguistics and Language Behavior Abstracts**, 1997

**California Prehistory** Terry L. Jones, Kathryn A. Klar, 2007-07-16 Some forty scholars examine California's prehistory and archaeology, looking at marine and terrestrial palaeoenvironments, initial human colonization, linguistic prehistory, early forms of exchange, mitochondrial DNA studies, and rock art. This work is the most extensive study of California's prehistory undertaken in the past 20 years. An essential resource for any scholar of California prehistory and archaeology!

**Cognitive Linguistics and Lexical Change** Natalya I. Stolova, 2015-03-27 This monograph offers the first in-depth lexical and semantic analysis of motion verbs in their development from Latin to nine Romance languages — Spanish, French, Italian, Portuguese, Romanian, Catalan, Occitan, Sardinian, and Raeto-Romance — demonstrating that the patterns of innovation and continuity attested in the data can be accounted for in cognitive linguistic terms. At the same time, the study illustrates how the insights gained from Latin and Romance historical data have profound implications for the cognitive approaches to language — in particular, for Leonard Talmy's motion-framing typology and George Lakoff and Mark Johnson's conceptual metaphor theory. The book should appeal to scholars interested in historical Romance linguistics, cognitive linguistics, and lexical change.

**Historical Environmental Variation in Conservation and Natural Resource Management** John A. Wiens, Gregory D. Hayward, Hugh D. Safford, Catherine Giffen, 2012-07-09 In North America, concepts of Historical Range of Variability are being employed in land-management planning for properties of private organizations and multiple government agencies. The National Park Service, U.S. Fish & Wildlife Service, Bureau of Land Management, U.S. Forest Service, and The Nature Conservancy all include elements of historical ecology in their planning processes. Similar approaches are part of land management and conservation in Europe and Australia. Each of these user groups must struggle with the added complication
of rapid climate change, rapid land-use change, and technical issues in order to employ historical ecology effectively. Historical Environmental Variation in Conservation and Natural Resource Management explores the utility of historical ecology in a management and conservation context and the development of concepts related to understanding future ranges of variability. It provides guidance and insights to all those entrusted with managing and conserving natural resources: land-use planners, ecologists, fire scientists, natural resource policy makers, conservation biologists, refuge and preserve managers, and field practitioners. The book will be particularly timely as science-based management is once again emphasized in United States federal land management and as an understanding of the potential effects of climate change becomes more widespread among resource managers. A variety of well-characterized cutaneous paraneoplastic syndromes (PNS) are diagnosed during internal malignancies. However, the spectrum of keratinocyte skin disease may include a wide variety of nonmalignant skin disorders that occur in association with malignancy. Paraneoplastic dermatoses and skin disorders that represent infiltration may be extremely valuable markers for internal malignancies.

Lack of familiarity with cutaneous clues of internal malignancy may delay diagnosis and treatment of cancer. In this review, we described several paraneoplastic dermatoses and cutaneous markers of internal malignancy. Certain cancers can present with cutaneous markers even in the lower extremity. These conditions are called cutaneous paraneoplastic syndromes and because they can manifest as cutaneous metastases or as typical lesions occurring in the context of certain cancer, it is important to recognize those that may indicate an internal malignancy.
