$x = 2$. To find the value of y , substitute 2 for x in the first equation. $y = -3(2) + 4 = -6 + 4 = -2$.

Therefore, the solution of the given system of equations is $x = 2, y = -2$. Check this solution by substituting the values into the second equation and making sure the

Online Library Algebra 2 Study

resulting equality is true. 2. A.
