~~Azolla Anabaena as a Biofertilizer for Rice Paddy Fields~~

Azolla is a fast growing free floating freshwater fern which fixes atmospheric nitrogen by forming a symbiotic association with a prokaryotic cyanobacterium -Anabaena azollae. It is a cost-effective, eco-friendly biofertilizer in lowland rice fields. As green manure in water logged soil, it enhances the rapid mineralization of nitrogen, improves the physical and chemical properties of the soil ...

~~Azolla Biofertilizer - The Nature's Miracle Gift for~~

The ability of azolla's symbiont, anabaena, to sequester atmospheric nitrogen has been used for thousands of years in the Far East, where azolla is extensively grown in rice paddies to increase rice production by more than to 50%. Rice is an enormously important staple in many tropical and temperate regions of the world.
