"Bird Sense", written by biologist Tim Birkhead, is a truly amazing book on avian biology. Covering all the senses that you're familiar with as well as a couple you may not have thought of. For most animals, birds included, vision and hearing are of primary importance for their day to day survival. But how good is their vision?

Unfortunately, this book is written from the scientists' point of view rather than that of the bird. It is a narrative of the experiments and observations over the last 400 years that have given us some clues about the workings of bird senses: sight, touch, smells, etc. A better title would have been "what it is like to be an ornithologist."

Bird Sense: What It's Like to Be a Bird by Tim Birkhead

If it means being socially conscious (in the sense of fighting for the Good and the Right) of course birds don't seem to have it. In between is what some animal behaviorists mean: the ability to sit back and think about what you are feeling or thinking. This isn't a normal meaning of consciousness, but it's used.

"Bird Sense" is a fascinating book. It brings us into the world as a bird senses it, with all its senses. Each specie develops its senses according to its needs, and these adaptations are unique and enable the bird to survive in a specific environment. I learned so much about birds and their survival techniques from this book.
