Loading the Library ¶ Like all services in CodeIgniter, it can be loaded via Config\Services, though you usually will not need to load it manually:

Pagination — CodeIgniter 4.0.4 documentation
\$this->pagination->initialize(\$config); echo \$this->pagination->create_links(); Notes: The \$config array contains your configuration variables. It is passed to the \$this->pagination->initialize function as shown above. Although there are some twenty items you can configure, at minimum you need the three shown.

Pagination Class : CodeIgniter User Guide
It is passed to the \$this->pagination->initialize() method as shown above. Although there are some twenty items you can configure, at minimum you need the three shown. Here is a description of what those items represent: base_url This is the full URL to the controller class/function containing your pagination. In the example above, it is pointing to a controller called " Test " and a function called " page " .

Pagination Class — CodeIgniter 3.1.11 documentation
In order to use pagination in CodeIgniter, the first thing you need to do is to load the pagination library. And we can do it by using \$this->load->library('pagination') . We've also loaded the URL helper so that we can use global helper functions provided by that helper.

Pagination in CodeIgniter: The Complete Guide
\$this->pagination->initialize(\$config); initializes the pagination library using the config array value that we defined and assign the above values to. \$page = (\$this->uri->segment(2)) ? \$this->uri->segment(2) : 0; checks if the skip number has been set in the second segment of the URI and if its not set then the value 0 is assigned to the variable \$page
