Continuous Glucose Monitoring Crucial Role of Primary Care in Diabetes Management. Primary care has become a center point for diabetes management. A... Benefit of CGM. Self-monitoring of blood glucose (SMBG) (the ...

Type 2 Diabetes Management in Primary Care: The Role of ...

No one in the know doubts that most diabetes care is done by primary care providers. No more than 20% of people with diabetes ever see an endocrinologist, and there are not nearly enough endocrinologists to handle the ever-increasing number of people with diabetes. The vast majority of diabetes management is, and in my view should be, in the hands of generalists.

The Role of Primary Care Professionals in Managing Diabetes

Price. £600. £648. £750. This six-month multi-professional module focuses upon the assessment and management of the patient with diabetes. Emphasis is placed upon the health needs of the patient, health promotion and self-empowerment. It is aimed at registered healthcare practitioners who have a role in the delivery and management of care for those patients living with diabetes and who wish to respond more effectively to the health needs of patients.

Diabetes Management - Primary Care Training

Type 2 diabetes is a global health problem with many patients failing to achieve recommended treatment goals. Most routine type 2 diabetes management is undertaken in primary care. Barriers to care include knowledge and resources, but also uncertainties about professional role boundaries, and clinicians' anxieties regarding treatment decisions.

Barriers to effective management of type 2 diabetes in ...
