The life of a three-phase stator winding can be shortened dramatically when the motor is exposed to unfavorable operating conditions — electrical, mechanical or environmental. The winding failures illustrated here are typical of what can happen is such circumstances.

Failures in Three-Phase Stator Windings

Motor rewinding is 10% materials and 90% labor cost. It takes no less or more time to burn out, cut and strip a 1/4hp stator than a 10hp. In fact, the tiny slots of the small motor make it a royal PITA to wind. I'd count on a minimum of \$300 or more. As said above, buy a new pump and only when you need it.
