Mammal Heart Dissection Guide | Carolina.com

Obtain a sheep heart and place the heart in a dissecting tray. Imagine the heart in the body of a person facing you. The left side of their heart is on their left, but since you are facing them, it is on your right.

# Access Free Heart Dissection Lab Guide

Position your heart in the tray so that it matches the diagram below.

## Sheep Heart Dissection

1. Place a heart in a dissecting pan & rinse off the excess preservative with tap water. Pat the heart dry.
  2. Examine the heart and locate the thin membrane or pericardium that still covers the heart. The pericardium or pericardial sac, is a double-layered closed sac that surrounds the heart and anchors it.
- The pericardium

## Sheep Heart Dissection Lab for High School Science | HST

There are many ways you can cut your heart, but the most informative will perhaps be directly down the interventricular sulcus. Find the line in the front of the heart, and make an incision that isn't too deep, only going through the top wall. Lightly pull the two parts so it opens like a book, and take a look inside.
