Introduction to business and management

A management information system (MIS) can be defined as a system that: Provides information to support managerial functions like planning, organizing, directing, controlling. Collects information in a systematic and a routine manner which is in accordance with a well defined set of rules. Includes files, hardware, software and operations research models of processing, storing, retrieving and transmitting information to the users.

Introduction to Management Information Systems (MIS) - MBA ...

Information management is a corporate responsibility that needs to be addressed and followed from the uppermost senior levels of management to the front line worker. Organizations must be held and must hold their employees accountable to capture, manage, store, share, preserve, and deliver information appropriately and responsibly.

What is Information Management?

Effective information management enables project teams to use their time, resources and expertise effectively to make decisions and to fulfil their roles. The process of information management encompasses: Collection of project information can take many forms, such as written, video, oral, audio or electronic. It is important to collect only as much information as reasonably needed and assure its quality, i.e. that it can be trusted (SOIPM3).
