The Hanford Engineer Works was built to create large quantities of plutonium at a roughly 600-square-mile site along the Columbia River in Washington State. More than 51,000 workers at Hanford constructed and operated a massive industrial complex to fabricate, test, and irradiate uranium fuel and chemically separate out plutonium. The Hanford landscape is also representative of one of the first acts of the Manhattan Project, the condemnation of private property and eviction of homeowners and ...

Hanford, WA Site - Manhattan Project National Historical Site

Much like the Oak Ridge site, the 670-square-mile area in southeast Washington state chosen for the Hanford site (located near the Tri-Cities area) was sparsely populated and conveniently located near abundant water sources for hydroelectric power. Though a desert landscape well stocked with sand and gravel for building, it too featured a moderate climate and rapidly ballooned from a few scattered families to a bustling city, housing 50,000 workers at the height of the Manhattan Project.

Hanford — Manhattan Project National Historical Park

Established in 1943 as part of the Manhattan Project in Hanford, south-central Washington, the site was home to the B Reactor, the first full-scale plutonium production reactor in the world. Plutonium manufactured at the site was used in the first nuclear bomb , tested at the Trinity site , and in Fat Man , the third bomb that was detonated over Nagasaki , Japan.

Hanford Site - Wikipedia

In 1943, residents were removed from a 586 square mile region just north of here. There at Hanford, for better or worse, scientists set to work figuring out how to harness the power of the atom, thus creating the atom bomb (working in concert with labs in New Mexico and Tennessee).

Hanford and the Manhattan Project - The Royal Tour

From 1942 to 1945, the Manhattan Project—an ambitious effort to harness the power of yet unimaginable science and technology—paired the world ' s greatest scientific minds with thousands of skilled and determined Americans. Their efforts created the planet ' s first nuclear weapons and ended the most terrible war in the history of humanity...and it happened in secret.
