~~Advice for mechanical engineers: get into nanotechnology~~

A nanotechnology engineer is someone who works around the smallest, most amazing fragments of science. From storing and altering things on the cellular level, to creating new, tiny pieces of electronics, nanotechnology engineers are the cream of the crop, possessing an acute attention to detail and a strong drive to make things better.

Nanotechnology is widely defined as “the science of engineering matter at the atomic and molecular stage”. It is the unique properties of materials manufactured or engineered at this level that has led supporters of nanotechnology to claim it could be used to benefit mankind in many ways, from treating cancer to preventing pollution.
