The practical capacity fixed cost allocation (\$556 per hour) is lower than the fixed rate at budgeted capacity (\$658 per hour). Lower costs are always better. Keep in mind, however, that the only reason the fixed cost per unit is lower is because you're spreading the same dollar amount (\$2,500,000 in fixed costs) over a higher number of hours.

Abstract. To realize an effective cost control, a practical and accurate cost accounting system is indispensable in hospitals. In traditional cost accounting systems, the volume-based costing (VBC) is the most popular cost accounting method. In this method, the indirect costs are allocated to each cost object (services or units of a hospital) using a single indicator named a cost driver (e.g., Labor hours, revenues or the number of patients).
