Reserving For General

The reserve for an insurance policy is defined as the price of

the future net cash flows of the policy with accumulation for

survivorship. Consequently, the reserve at time n when the

financial market is in state o is given by the following

expression. This is a prospective reserve formula. The

reserve will rarely have a closed formula

Pricing And Reserving For General Insurance Products
The pricing basis contains the assumptions you use when you decide what price to charge to your customers - what you think might happen (with investment return, mortality, withdrawals etc) before you write the policy. The reserving basis is the set of assumptions you use when calculating a reserve for a policy - the amount you need to set aside to pay future claims, (net of future receipts).
