### The Allocation Of Health Care

The allocations process uses a statistical formula to make geographic distribution fair and objective, so that it more clearly reflects local healthcare need and helps to reduce health inequalities. This page contains the allocations and associated documents for the 2019/20 to 2023/24 allocations round.

The Allocation of Health Care Resources: An Ethical ...

The competition for limited health care resources is intensifying. We urgently need an acceptable method for deciding how they should be allocated. But the goods that health care produces are of very different kinds. Health care can extend the lives of children and of older people. It can make it possible for a person to walk, when without health care that person would be permanently bedridden ...

---

The Allocation of Health Care Resources: An Ethical ...

Until the 20th century, US health care was allocated by the ability to pay or barter, with small numbers of individuals consuming the bulk of the resources, leaving few resources available to others. During the past 100 years, increased interest in good personal and public health resulted in the development of various forms of health insurance.

---

Allocation of Health Care Resources: Principles for ...

A methodological approach is needed for allocating health care resources in an efficient and fair way that gives legitimacy to decisions. Currently, most priority setting approaches tend to focus on single or limited benefit dimensions, even though the value of new health care interventions is multi-dimensional.

---

Resource Allocation and Priority Setting in Health Care: A ...

The Department of Health sets the cash-limited budget available for allocation to PCTs. In the financial year 2006–2007, this amounted to £64.310 billion. 2 These funds are then distributed to PCTs to finance hospital and community health-care services as well as all prescribing, primary care and health promotion. While formulae are applied to all the categories of expenditure, this paper focuses mainly on the acute sector, which accounts for 66% of all PCT expenditure.

---

WHO | Resource allocation and purchasing in the health ...

In summary, this chapter addressed the problem of how to allocate scarce health care resources between different individuals and groups in society. It demonstrated that competing conceptions of justice lead to very different distributive approaches. Moreover, the problem of health care rationing is hardly a problem that looms in the future.

Healthcare Resources, Allocation of: I. Macroallocation ...

In areas of resource allocation within healthcare, the opinions of the public have consistently been shown to be different from those of healthcare professionals and politicians (Kinnunen 1998). In the emotive world of resource allocation in healthcare, we tend to assume that in order to provide care for an individual, we prevent other members of the public from accessing this care.

---

The Allocation of Health Care Resources: An Ethical ...

Physicians' primary ethical obligation is to promote the well-being of their patients. Policies for allocating scarce health care resources can impede their ability to fulfill that obligation, whether those policies address situations of chronically limited resources, such as ICU (intensive care unit) beds, medications, or solid organs for transplantation, or “ triage ” situations in times of scarcity, such as access to ventilators during an influenza pandemic.

---

Allocating Limited Health Care Resources | American ...

The methods and principles of allocating centrally provided health care resources to regions and areas are reviewed using the report of the Resource Allocation Working Party (RAWP) (Department of Health and Social Security, 1976) and the consultative document (Department of Health and Social Security, 1976a) as a basis.

Principles of allocation of health care resources.

The government ' s health and social care reforms risk creating a more complex and fragmented resource allocation process. The current system lacks transparency and the formula is so complex that most local citizens, politicians and clinicians find it difficult to interpret.

---

Improving the allocation of health resources in England ...

The fair allocation of resources for health and social care in relation to the needs of the population in different parts of the United Kingdom has become particularly important since the implementation of the new arrangements for community care in April 1993. These depend on close collaboration between health authorities and local authority social services departments.

---

Equity in the NHS Allocating resources for health and ...

In the COVID-19 pandemic, many health system and state policymakers are working with no established methods for making decisions about allocation of scarce but lifesaving health care resources for patients and personal protective equipment for health care and long-term care workers. In many settings, decisions are being made ad hoc, with limited information and no input from patients and families, and criteria for allocation of scarce medical resources are not settled.

---

Health Care Resource Allocation Decisionmaking During a ...

Important variations in access to health care and health outcomes are associated with geography, giving rise to profound ethical concerns. This paper discusses the consequences of such concerns for the allocation of health care finance to geographical regions. Specifically, it examines the ethical drivers underlying capitation systems, which have become the principal method of allocating ...

---

Ethics and geographical equity in health care | Journal of ...

Resource allocation is the distribution of resources – usually financial - among competing groups of people or programs. When we talk about allocation of funds for healthcare, we need to consider three distinct levels of decision-making. Level 1: Allocating resources to healthcare versus other social needs.
