Human communication is a distributed process that depends on a circuit of brain regions, especially frontal and temporal cortical regions. Broca area, located in the ventral frontal lobe on the inferior frontal gyrus (IFG), is considered essential in the motor control of speech.

Human Communication—an overview | ScienceDirect-Topics

In the 1960s, H. Marshall McLuhan, media theorist, critic, and visionary, asserted that societies are changed by the advances of technology, especially communication technologies. He is well known for his prophecy that communication technology would one day make us one great "global village". In the end, the processes and theories regarding communication in our daily lives to exchange information, create meaning, and share understanding remain a critical component of human relationships.
