A domestic ice cream maker is a machine used to make small quantities of ice cream for personal consumption. Ice cream makers may prepare the mixture by employing the hand-cranking method or by employing an electric motor. The resulting preparation is often chilled through either pre-cooling the machine or by employing a machine that freezes the mixture. An ice cream maker has to simultaneously freeze the mixture while churning it so as to aerate the mixture and keep the ice crystals small. As a

How does an ice cream maker work? To make ice cream, you need to slowly churn your chilled ingredients while simultaneously freezing them. The churning works plenty of air into the mixture — this gives the dessert its creamy, smooth texture — and the freezing, of course, is what defines ice cream. You can make ice cream entirely by hand.
