The Industrial Revolution - Home

The Industrial Revolution, which took place from the 18th to 19th centuries, was a period during which predominantly agrarian, rural societies in Europe and America became industrial and urban. Prior to the Industrial Revolution, which began in Britain in the late 1700s, manufacturing was often done in people's homes, using hand tools or basic machines.

The Industrial Revolution - 6TH SIX WEEKS WEEBLY PROJECT

The United States' Industrial Revolutions occurred after the European and English Revolutions, primarily from 1870 to 1920. During this time, the United States made the change from being an agricultural nation to an industrial one.

Industrial Revolution - Home

The Industrial Revolution began in Britain in the late 1700s where industrialization helped transform society from manufacturing by hand in their homes to having machines to help improve transportation, communication, and banking.

The Industrial Revolution - Early Republic

The Industrial Revolution (1760 - 1830) is known as the period of time in which many different aspects of life (such as technology & communication, transportation, and social structures) became more advanced whether that be for the better or for the worse. Trade routes expanded which lead to the increase in movement of people.

INDUSTRIAL REVOLUTION - The Frankenstein Project

Before the Industrial Revolution, there were very few roads, and even they were in bad condition. They were muddy, flooded easily, and were filled with boulders. This made travel by stagecoach or wagon very difficult and dangerous. That all changed in 1817.

Transportation Revolution - The Industrial Revolution

The Industrial Revolution was a world of black smoke and death on every modernizing nation on the globe. By humankind's nature, people are meant to divide themselves into different categories by beliefs, money, and skin color. In the Industrial Revolution, money was what divided the people in modernizing countries.
