Psychology: The Science of Mind and Behaviour 6th Edition ...

The Birth of Psychology as a Science. From the Lecture Series Redefining Reality: The Intellectual Implications of Modern Science. October 8, 2020. By Steven Gimbel, Ph.D., Gettysburg College. According to the science of genetics, a person needs to be put under a microscope to be understood, and the study of reality starts with an atomistic view. However, psychology is different since it deals with a complex entity: the human mind.

The Birth of Psychology as a Science

The psychology of science is a branch of the studies of science defined most simply as the scientific study of scientific thought or behavior. It is a collection of studies of various topics, which qualifies it as a science. The thought of psychology has been around since the late 19th century. Research on the psychology of science began in 1874, the field has seen a substantial expansion of activity in recent years.

Psychology of science - Wikipedia

Psychology is the scientific study of mind and behaviour. Though it is easy to think that everyday situations have commonsense answers, scientific studies have found that people are not always as good at predicting outcomes as they think they are.
