I recently lost one of my tilt/trim units on my port ox66 250. The engine was locked in the down position, so removal of the unit was problematic. Since the unit was toast, I ended up drilling a pilot hole in the screw to relieve pressure and raise the engine to pull the unit out. Fortunately, I had a spare unit from an old engine; its fully operational, but has the same problem with the screw ...

Keep the trim rams fully retracted when not in use to prevent corrosion build-up. Engage the tilt lock mechanism built into the outboard's bracket, or install a Yamaha engine support to hold the engine in the tilt-up position. Then, withdraw the tilt rams into the unit by pressing the PT&T down button until they are fully retracted.
